

After years of design, the Kasting company has finalized a unique third generation case collector for the HK416 rifle, it was made with the imperatives of the doctrine of use and safety of the rifle of the French Infantry School of Draguignan.

- ✓ Consistency with ISTC gestures and OMGF shooting;
- ✓ Permanent visual and tactile control of the cartridge chamber;
- ✓ Compatibility with the mounting of the equipment optics;
- ✓ Resolves shootings incidents without disassembly;
- ✓ Single shot and burst with all ammunition types;
- ✓ Ensures normal operation of ejecting a fired case;
- ✓ No loss of cases even with directed weapon;
- ✓ Fireproof catch system with a capacity of at least 30 cases;
- ✓ The smoke must not be directed towards the shooter;
- ✓ Quick tool-free assembly and disassembly;
- ✓ Use with cold weather gloves;
- ✓ No modification of the weapon needed;

It is in partnership with the 27th BCA (27th Mountain Infantrymen Battalion of the French Army), mandated to select an optimal case recovery system that meets the most rigorous requirements in extreme cold conditions, that the Kasting company was able to test, modify and optimize its product. The 27th BCA officially homologated the recuperator in 2023.

The most secure solution to manage shooting waste.
